# Beauty of Wood, Benefits of Aluminium.

Knotwood creates stunning aluminium systems with unique woodgrain and powder coat finishes. Made from 100% aluminium, all Knotwood products are non-combustible, durable and require minimal maintenance.

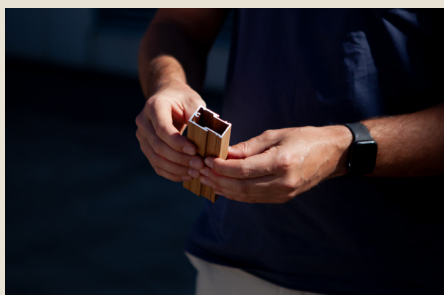

# Our Profiles.

Our cleverly designed aluminium profiles are versatile and easy to install. All components simply clip together and don't require welding. The fixings are completely concealed for a clean and seamless finish.

Knotwood offers incredible customisation with profile shapes and sizes, spacing preference, angle options, different backing alternatives and a range of finishes.

To view our complete extrusion list, please visit [www.knotwood.com.au](http://www.knotwood.com.au)

## Battens

Over 20 different shapes and sizes. Great for facades, screens, shutters, fences, awnings and more.

## Cladding

Simple, modern cladding boards designed for easy installation. Great for walls, soffits and facades.

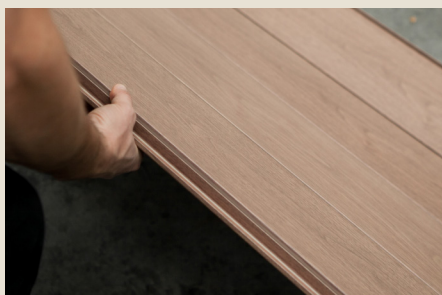

## Slats

A variety of shapes that integrate with our posts and framing systems. Ideal for fences, gates & balustrades.

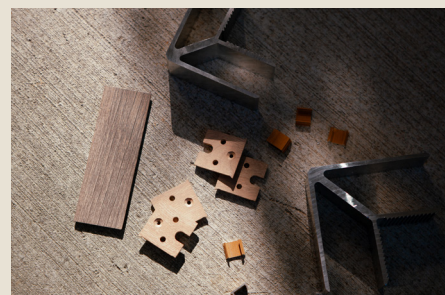

## Geometrics

Hollow sections, angles and channels that can be used independently or integrated with other systems.

## Decking

Non-combustible and heat dissipating. Great wood alternative that doesn't rot, warp or require resealing.

## Accessories

Matching end caps, spacers, joiners and additional components to complete each system.

Facades

Cladding / Soffits

Ceilings / Walls

Fences / Gates / Balustrades

Screens / Shutters / Louvres

Pergolas / Awnings

Decking

**Made in Australia**

Knotwood is manufactured on the Gold Coast using sustainable manufacturing methods. This means shorter lead times, reliable warranties and product that is built to Australian standards.

## Non Warping

Knotwood's aluminium lengths are lighter, stronger and straighter than real wood. They won't warp, shrink or splinter over time.

## Low Maintenance

Our specialised powder coated finish has outstanding properties to ensure ease of maintenance and longevity of your surfaces.

## Lightweight

Aluminium has a high strength-to-weight ratio. Its weight is one third of steel, which means lower transportation costs and easier installation.

## Colour Stability

Knotwood's colours have been tested to withstand the most extreme environments, ensuring that your colour choice looks better for longer.

## Weather Resistant

Knotwood won't swell, rot or rust when exposed to wet conditions. Unlike wood, it is protected from corrosion in harsh environments.

## Insect Proof

Knotwood is impervious to termites and ants, and therefore doesn't require additional chemical treatments to be protected from pests.

## Non Combustible

Knotwood is non-combustible in accordance with Australian Standard AS1530.1. It achieves a Group 1 fire rating and is BAL FZ compliant.

## Scratch Resistant

A topcoat of specially developed, exterior grade paint is baked on to provide resistance to chipping, flaking, blistering and scratching.

## Eco Friendly

Knotwood is 100% recyclable, uses VOC free coatings and lead free finishes resulting in a smaller environmental footprint for us and for you.

# Colour Range.

Inspired by nature, Knotwood offers an ever-evolving range of woodgrain colours and finishes. Our specialised sublimation process transfers our unique woodgrain designs onto a powder coated surface. The result is a natural timber aesthetic with a textured matt finish. Our products are also available in a wide variety of solid powder coat colours.
